This Work

*I dedicate to those sincere and brave Jews who honestly believe
in a final Home for ALL the Children of Israel!*

: : :

*The picture on the cover is symbolic! . . . In the shades of the
date trees was rocked the Cradle of Israel; the Pyramids are the
monument of their bondage which still continues; the new moon
signifies renewed Hope in the future.*

I

This is a desperate appeal to the Gentile and Jewish world, especially to the younger generation of the latter—as we are witnessing the extermination of the Jewish People in the Old World—to cooperate in saving this unique “race,” which in spite of its repulsive characteristics in the eyes of the Gentiles, has produced a Moses, a Jesus, a Spinoza, an Einstein, a legion of martyrs to human progress and culture, and helped to create the foundation of our present civilization. Perhaps the Jews are an anachronism in our age, and perhaps their mission is finished. So is that of the American Indian. Yet enlightened governments have created “Indian Reservations” and even “Gorilla Sanctuaries!” Then why not a “Sanctuary” for these gifted “Sub-humans,” as our noble Aryans in Germany call them?

In spite of the heroic struggle of the enlightened elements, the tremendous forces of reaction all over the world, will prevail under the surface and will force the hands of the leaders of the great democracies. No matter how the great powers will bargain or agree, one thing is certain: the Jewish people will be forgotten and left to be exterminated. Hitlers butcheries are but the introduction, the New World will continue where he left off. This time the Jewish People will face the dilemma: “To be or not to be . . . !” Their life and death struggle is on.

For 1800 years the Jewish problem has kept on growing like a cancer, and turned into a chronic, festering sore on the body politic of the occidental peoples. It is now a World Problem. This festering sore can no longer be healed with incantations, quack medicines, half measures, relief,

national homes for the persecuted, assimilation, migrations, or ghettos. This time only a ruthless surgical operation will save the patient from certain death. Scores of books and pamphlets have been written on this question, but they possess academic value only, or are persuasive propaganda to induce the Jews to go to Palestine, the "Home of their Fathers" and the "Promised Land." The hopelessness of such a solution has never been admitted yet. Nor has it ever been acknowledged that even if Palestine ever was settled by a few thousand Jews and made their spiritual center, the real issue would not have been touched.

This pamphlet calls to action, and to radical action at that, through pressure from all sides. I feel that a solution of this problem is immediately urgent. We are now entering the climax of the world revolution started at the end of the first world war, and the Jewish question will be forced to a head. The good intentions, but half hearted efforts, of the British government and its several offers of some little patches of land in Africa cannot solve the future of thirteen million people roaming all over the world, homeless, and everywhere merely tolerated, or reduced to the level of the pariah! An heroic effort is needed on the part of the whole civilized West to solve this Herculean task.

II

What is the situation now?

The most anomalous phenomenon in the history of the world, the Jewish People, reached its greatest number after 2500 years of fierce persecution and wandering through countless hostile countries. There were 16 and one quarter million Jews in the world when Hitler started exterminating

them. Today I believe there are still about 13 million Jews left roaming all over the world. Although they are scattered in all countries, we find two spots on the map where they succeeded in concentrating the bulk of their population.

One of these spots is in the United States of America, with four and a half million Jews, and the other is the old Jewish Pale, in Eastern Europe. This pale is formed by Poland, Roumania and Ukraina, where these three countries meet. Here were about seven and a half million Jews conglomerated before Hitler arrived. While the United States of America is regarded as the Jewish "heaven," the "pale" is known as the Jewish "hell." Not far from there lived another two million Jews in smaller flocks—in Germany before Hitler about half a million; in Austria about a quarter of a million; in Hungary about a half million; in Czechoslovakia about 360,000, in France about 225,000, in England about 300,000; and the rest are scattered all over the globe. Hitler killed about 3,000,000 so far. In most of these countries the Jews have attempted to assimilate, but their efforts turned out futile. In Eastern Europe only a very few attempted it at all; the great majority remained orthodox.

In the enlightened western countries the Jews have become full citizens, theoretically at least. But in practice the Gentile world could never conquer its prejudice, and discrimination has been going on everywhere, in some countries more, in others less. Although the Jew has not been treated with the violence of a few generations ago, he has not been accepted as an equal in social and public life anywhere, and since the first world war even the most enlightened western countries have revived antisemitic practices. Both France and England have witnessed anti-Jewish demonstrations, and the territory east of the Rhine has fallen back into the Dark Middle Ages. Germany openly admits its intention of exterminating the Jewish people all over the world. It is a fundamental principle of Nazism. Neanderthal has risen from the dead and we have been witnessing massacre and robbery: the like has not taken place since the disappearance of this prehistoric race, some of which, no doubt, were the founda-

tion stock of the present day Teuton "Supermen!" Neanderthal is in Germany of course. Nazism is not a political creed as many people think, it is a typical case of atavism. A type of mind prevailing in prehistoric times when cannibalism was the rule. During the more tolerant ages this atavistic type reappeared and multiplied, since society was not cruel enough to dispose of them. They multiplied until they were strong enough to conquer the civilized members of society. Jew hatred is but one outlet of their truculent instinct. The Jews of course, being a defenceless, homeless minority are an easy prey for these savage cowards.

III

What is the cause of it all?

Antisemitism of course. Our present civilization seems to be a victim of this malady, and it has two roots: prejudice and the prevailing economic system. Therefore as long as these roots find nourishment, antisemitism remains hopelessly incurable.

Prejudice and Jew hatred will exist as long as Christianity insists on indoctrinating its believers from their early childhood with the guilt dogma of the death of the Son of Man. A little child when first taken to a church is horrified at the gruesome sight of a blood dripping body nailed to a cross with a crown of thorns. Never will any human get over this first shock and the hatred of those who are supposed to be guilty of this crime. From his childhood to his death he is told hundreds of times that it was the Jews who betrayed and killed the Son of Man. Only a spark is needed to ignite this latent hatred into a blaze.

This spark is delivered by the age old competitive capitalistic profit system. The Jewish people having been forced

to concentrate on trading for centuries, acquired superior skill. While times are good he is regarded merely a nuisance, but when times get bad the Jew becomes the villain. He is held responsible for all evils and is made the scapegoat. Whether antisemitism would disappear under another economic system—I can not tell, I merely stated facts. Perhaps when Utopia arrives! But can the Jewish World Problem wait until millennium?

How do the Jews act in face of this perpetual danger? Like ants forming a trail across the road! Thousands are trampled to death, yet the rest go on and on unconcerned. Following this age old habit they began their trek to the New World. Now America is the final haven, forgetting that not long ago Hungary, France, Italy, even Germany, etc., were regarded as such.

No doubt America is a wonderful country, it started a great dream of humanity. It carried the torch of enlightenment, civilization and progress a long way ahead. If the dream of the Founding Fathers could be realized, what good fortune it would be for humanity. But aren't humans the same all over the world? Aren't they growing up, going through the happy, hopeful days of youth, then through the strenuous and more sober years of manhood and womanhood, finally to end in disillusioned, callous old age? Alas, America passed the happy innocent age of youth where everybody was equal and welcome. America grew up. The playmates don't recognize each other as equals any more. There are the rich and the poor, the 100 per center and the new-comer, the white Christian and the inferior colored ones, the Jew and the Gentile Aryans, and so on. The clouds over America are lowering and the people might have to fight again for the ideals of the Founding Fathers. Yet the Jews have just discovered that this is their final haven.

Jews in America wake up, the American dream is over! The liberal era here too is drawing to a close. The chances are that the whole New World will go fascist while the Old World will accept communism. Hitler won in spite of military defeat. He planted the roots of his ideas firmly

everywhere. Look around! Where is justice, freedom and opportunity for all? Watch Congress, the Courts. Watch the Press, Radio and Movies. Equality of opportunity ended in an ever increasing concentration of wealth, while the masses are in constant fear of unemployment. The U. S. A. of today is but a pseudo democracy!

Tolerance! Since the Ku-Klux started we can count now over 30 fascist-nazi organizations all directed against the Jews first of all. They are being "tolerated" in the name of "Freedom." But savage antisemitism is spreading like prairie fire. There is nothing American left of the original America, we are really a New Europe. Yet the Jews feel safe here. I cannot see why an American should be different from the European. He comes from the same blood. Every third American is of German descent and only every fourth is of Anglo-Saxon blood. The rest descend from the same peoples who help exterminating the Jews in Europe. The melting pot is not so hot any more and the Jews will find that they have not been melted in at all. Everything went all right so long as America went through its expansion era. The days of the frontier are over and when the next depression comes it will be the Jews who will have to be sacrificed. The pattern is the same as in the Old World. It will come with mathematical certainty.

These words will be called outrageous; some will call me a traitor. Yet there is none more loyal to America than I am. A few years ago I warned the Jews in Central Europe, I predicted their fate. They just smiled. They never smiled since. Most of them said they are not members of the Jewish Race, it's merely their religion. The Jewish Nation lives in Eastern Europe, let them go to Palestine. After all my experience, of course I feel nauseated, when I hear the statement that the American Jews are not a part of the "Hebrew Nation."

In face of all this I say that now is the time for all Jews, including the American Jews, to retire gracefully. A famous doctor said that the time to quit eating is when you enjoy it most. The American Jews as a gesture of gratitude for

all the good they enjoyed here, should save America the ugly spectacle of pogroms. The Jews are definitely not wanted among the Western peoples, they should go while the going is good! While it is calm before the storm.

Go!—But where is the place we are wanted?

You are not wanted anywhere, least of all in the "Promised Land," which you believe you may claim rightfully as the land of your fathers!

IV

What is the solution then?

Many solutions have been offered and much has been written about it. But all solutions so far have been but half-hearted palliatives or evasions.

Some governments offered a strip of land to settle the "persecuted" Jews, some philanthropist bought a few acres of land in Palestine supporting a few Jews. Now came the Zionists with an enthusiastic plan to lead the Jews back to their "legal" homeland, only to be told by the present owners to keep out. Another group, the territorialists, hoped to build a new fatherland in a new country, without knowing where they would be welcome, only to be opposed by the orthodox Jewry. The latter prefer to wait till Messiah leads them to the Holy Land. This excuse has been supported everywhere by the wealthy classes and rabbis with fat incomes. Finally the progressive elements declared that the Jews should give up the idea of nationhood and become absorbed by other nations. Then came Hitler with a short cut and made a pretty good start to bring about the most "desirable" solution, but in spite of best efforts there are still

over 13 million Jews roaming all over the world in quest of a sanctuary or "Fatherland."

The Jewish people growing desperate as the climax approaches, again revert to the idea of going back to the land of their fathers, Palestine. Facts and reason cry aloud, that this small and poor country cannot solve the problem economically and least of all politically. Britain will not antagonize the Arabs for a questionable solution of the Jewish problem. Because if only a part of the 13 million Jews can settle, what would be achieved? The diaspora would be shifted, regrouped. Palestine would become a huge ghetto composed of a few million Jews packed like sardines and surrounded by a hostile Arab world.

After all, those Arabs have been in possession of Palestine for about 1200 years. The Jews also spent only 1200 years there from the time of conquest to the time the Romans destroyed Jerusalem. But the diaspora started much sooner, as a matter of fact it started in Solomon's time already. The cause has been the same, mostly of economic nature. Poverty of land, lack of raw materials, lack of territory for expansion and no chance for enterprise. Hence the chronic unrest, political and religious strife, aggravated by foreign invasions. And Palestine did not grow bigger nor richer since.

Then there is no legal place on earth the Jews may claim?

Yes there is! The real "Promised Land," which Providence reserved is still waiting for the Jewish people to be settled by them. It is safer, richer, larger and almost empty. So if Palestine is denied them their situation is not hopeless yet. Moses knew what Palestine was, but to induce them to leave the "fleshpots of Egypt" he had to promise them a good land before taking them to the desert. Like a real estate promoter he told them that "there flows milk and honey." He reached his goal. He saved and established the Jewish People, organizing and drilling them for conquest, giving them their laws and religion, settled them in their first independent home in Palestine. His job was finished. Had the Jews a man like Moses today, could he solve their problem and how would he go about it—I wonder?

Yet there is a solution and I am going to lead up to it now. I shall approach it from a different and unusual angle even though I am expecting a horrible outcry from both Jews and Gentiles alike.

V

Who are the Jews anyway?

The Jews are an uprooted nation, thirteen million strong, with an exclusive tribal religion, roaming all over the world like gypsies; yet they are the guardians of the highest type of monotheism and morality known since the dawn of civilization. With the exception of the intellectuals, the average Gentile and Jew alike still firmly believes that the Jews are an Asiatic race, and the purest race in existence, a race whose fatherland was Palestine. This is erroneous. The Jews are not Asiatics. They are not a pure race; nor was their fatherland Palestine. They are an African people, of the most mixed racial stock in existence, and their fatherland was Egypt! This fact bears a most important relation to their future, because it is the key which will unlock the door to the final solution of the Jewish world problem. Let us examine some facts of historical value.

Looking into the past this is the history of their origin.

About four thousand years ago a fierce individualist, with a pioneer spirit and unbounded fanaticism, a semitic Hebrew shepherd, by the name of Abraham, left the Mesopotamian town of Ur to find a free country where, like the Pilgrim Fathers of America, he could worship his God according to his own ideas. He started west and arrived somewhere in

the southern part of the present day Palestine, where he found the country already settled. This immigrant failed. But his grandson Jacob made good. He left this poor country and drifted south. With his Aramaean wives and concubines, sons and daughters, and grandchildren, sixty-six all told, he drove his flocks to Egypt, to the America of those days, attracted by its rich pastures and wealth. This little band of Hebrews decided to remain in Egypt permanently; they were welcomed by the original inhabitants. The sons and grandsons of these settlers, being polygamists like their fathers and all Orientals, took their several wives and concubines from the Egyptians because there was but one female to each male of Jacob's blood available. Joseph married the daughter of an Egyptian priest, and with Joseph's sons, Jacob's flock counted seventy souls. This intermarrying continued through several centuries. All went well until the Hyksos overran the country. Many Jews, to save themselves, collaborated with the invaders. When the Egyptians drove the Hyksos out, in retaliation Pharaoh enslaved the Jews, which enslavement lasted until Moses succeeded in eluding the Egyptian army and led them into the desert. But since Palestine was not conquered until 1200 B. C., it follows that the Jews must have spent at least six hundred years in Egypt and the Egyptian province of Sinai, including the time they spent in the desert with Moses. The Biblical account allots four hundred and thirty years only, but the dates of the Bible are not reliable. Even history is in the dark about this age. When the Jews, including the Levites, left Egypt they were about 625,000 strong. The Bible gives the definite figure as 603, 550, but most probably this did not include the Levites and the women and children.

Thus we see that Jacob's little band had grown into a mighty people of twelve tribes, a considerable number in those days, which Moses organized in the desert and drilled into a powerful army, strong enough to "muscle in" among the tribes inhabiting Palestine.

It seems inconceivable why the Jews always speak about Palestine as the land of their fathers. Neither Abraham nor

Isaac ever conquered it; they merely tried to settle there. The twelve tribes were born and raised by a majority of Egyptian women in Egypt, an African country, where they became a well organized and accomplished nation. They received their religion and laws in the Egyptian province of Sinai, and when they attacked Palestine they were a people fixed in a mould and consolidated into a nation in spite of mixing with other races.

The Mayflower landed the Pilgrim Fathers in America in 1620—three hundred and twenty-five years ago. Suppose their descendants, the American nation, should emigrate in toto and wander for 2800 years, as the Jews have done ever since they left Egypt. Would they deny their American fatherland after 325 years spent there, even if they had spent a long period of time in some other country? Yet the Jews deny their Egyptian fatherland after six hundred years spent in that country. They cannot see that their "fatherland" in Palestine was merely the first "big stop", an attempt to create an independent state, which failed. They conquered Palestine, at least a part of it, about 1200 B. C. But after fighting each other in continual factional and dynastic wars, Jerusalem was destroyed in 586 B. C. by the Babylonians. That ended the independent nationhood of the Jews and the "Land of Promise." They had split even long before that, after the death of Solomon, and the ten tribes were wiped out. After the restoration, little Judea carried on, but most of the time as a province of some great power. And again internicine wars and factionalism was the main life of Judea. True enough they fought bravely to defend their nationhood and retain at least some semblance of a Jewish state; but they failed, and their heroic fall in 70 A. D. ended their sojourn in Palestine. The "Land of Promise" meant much suffering and very short glory! Then began 1800 years of wandering all over the world. They might as well call Europe their fatherland, for they have spent over 600 years in Eastern Europe, a period almost as long as that of their independent statehood.

Another reason why the Jews cannot rightfully claim Palestine as their final homeland is the fact that the diaspora

started long before the destruction of Jerusalem by the Romans. It began after the death of Solomon. At the beginning it was mostly the business men who settled abroad, and probably a good many of the ten dissatisfied tribes. Even at the time of the first destruction of Jerusalem by the Babylonians in 586 B. C. the emigrants found a large community of Jews in Egypt; and further, the majority of the Jewish exiles in Babylonia never left that country. The truth of the matter is, the Jews discovered very early that Palestine was and is too poor a land to nourish a great nation. There was no room for development and no opportunity for enterprise. The best elements soon started to emigrate in disgust, tired of the eternal theological squabbles and factional warfare. Only the fanatics and the wealthy classes, the priesthood and the proletariat, stayed on in Jerusalem. The greatest achievements, the Law and the Talmud, were created abroad. Art and Science never flourished. The only real achievements of the Jews in Palestine were their religion and some of the prophets. When Jerusalem was destroyed by the Romans, the best of the Jewish people were already settled abroad. Now began the real development of the Jewish people, even though at a price of immense suffering. Driven from one country to another, they learned much and kept Judaism intact; and wherever they were given a chance, they contributed to the achievements of the West.

Evidently Palestine was never meant to be the final home of the Jews. At the very outset it was a mighty unsafe place, and the "Promised Land, where milk and honey flows" was nothing more than a high pressure salesmanship slogan—something like the enticing offers of a California real estate broker. Instead of milk and honey, blood flowed most abundantly there. In the seventh century A. D. Palestine was conquered and settled by the Arabs; and the Arabs today rightfully may claim to have spent as much time there as the Jews did, uninterruptedly. As a matter of fact, the Jews spent but 1200 years in Palestine, with a big holiday in Babylon, while the Arabs have been there for over 1200 years without interruption. So the Zionist claim that Palestine is the only legal and final home of the Jews, is rather weak! That the

Jews feel in their hearts this is so, can be proven by the poor response to the call of the Zionists. They prefer to send old people there to the wailing wall, or perhaps make a pilgrimage trip to the Holy Land. But all the howling about the "Land of the Fathers" is not sincere, or at best, is merely symbolical! Palestine was not meant by Providence to become the final homeland of the Jewish people. It was to be the longest stop and camp in their quest for a homeland, a first attempt at political independence and building up of a state, thus gaining invaluable experience.

I believe the cradle and puberty of the Jewish People was in Egypt; their adolescence was spent in Palestine; their adulthood in Europe and America. Their ripe manhood and womanhood will be spent in the final homeland. Where will it be?

In answering the question, "Who are the Jews anyway," isn't it clear that the land where the cradle stood, is the true and legal birthplace? Since the Jews were born and raised in Egypt, aren't they of Egyptian origin? And since Egypt and Sinai, its northeast corner, are located in Africa, aren't the Jews a 100 per cent African People?

This fact will turn out to be their last hope!—Because the real "Promised Land" is in Africa, reserved for them by Providence. It is the last country, almost empty, which is fit for the white man as a permanent home. Since the Jews are the only homeless white Africans, it is their rightful share on Earth! Before God and all mankind, they have the right to claim this land for a "Sanctuary" and "Final Homeland!" This land is called Rhodesia now, it shall become Nova Judea, where the tired Jewish People shall spend their ripe manhood and finish their existence in a happy old age!

Rhodesia, the future Nova Judea (See map on page 17) is located out of reach of all Antisemites, splendidly isolated, in South Central Africa, under British rule. It is hemmed in by the following countries: On the north by the Belgian Congo and Tanganyika; on the south by the Union of South Africa; on the east by Portuguese East Africa; and on the west by Portuguese West Africa and Bechuana Land. It was founded by Cecil Rhodes about 60 years ago, while recovering from tuberculosis there, hence its name. This large territory comprises about 442,000 square miles. It is divided into two parts by the Zambesi River. The territory south of the River Zambesi is called Southern Rhodesia, now a self-governing dominion with about 53,000 white people on 152,000 square miles; and the other half north of the river is called Northern Rhodesia, a British Crown Colony. This territory is also divided into two parts, Northeast and Northwest, with a white population of about 12,000, on 290,000 square miles. And the whole country has about 1,900,000 black natives. The density of the population is four and a half souls per square mile.

Rhodesia, being an extensive territory, naturally varies considerably in its physical features. There are some low lands, swampy, with a tropical vegetation, and some high mountain areas with wonderful hardwood forests; in fact Rhodesia has the hardest wood on earth, the so-called Rhodesian teak, which is fifty per cent harder than real teak, and might become the material for a magnificent home industry in furniture and woodcarving.

Most of the territory is a high plateau, ranging from

South Africa.

3000 to 5000 feet above sea level. These high plateaus are undulating plains, diversified by steep hills and isolated woodlands. Most of it is fertile and very good grazing land; therefore cattle grazing is an extensive industry, besides diversified farming. Maize, cotton, tobacco and ground nuts are staple products. In the lower lands where irrigation is available, citrus fruit growing is a lucrative industry.

The mineral wealth is great, especially copper and gold, which are extensively mined. The waterpower of the Victoria Falls surpasses anything of its kind in existence. This, connected with the abundance of cheap copper, makes it possible to electrify the whole country and found a great industry. Here is a chance to develop a world famous copper-smith industry, a craftsmanship on Chinese-Japanese and oriental pattern; also goldsmith work might be included. These industries, copper and goldsmithing, wood carving and hardwood furniture production, might become great if founded on special art and craftsmanship as home industries, and a source of great wealth.

Since the country is located between the eighth and twenty-third parallel of latitude south of the equator, the land is supposed to be tropical. But the high altitude makes it very pleasant all year round, similar to that of Palestine, especially the winter months from May to September. Being south of the equator, the seasons of course are opposite of those of the Northern Hemisphere. The winter there is dry and mild. The days are warm, but at nights during June, July and August even light frosts occur. Nights are always cool. But the summer months are not so pleasant. The rainy season starts in October and lasts till March. The rainfall is sufficient; it varies according to locality from about twenty to sixty-three inches. The average temperature varies between sixty and eighty degrees Fahrenheit, according to altitude. It often hits the one hundred degree mark in summer. Yet it is not worse than in Chicago or New York.

This all year round warm climate and mostly pastoral type of country life should be a great help for the settlement of the Jewish mass immigrants, because they can live all year

round in tents. The greatest capital outlay, the building of expensive homes, is not needed there at the start. Furthermore, the chance to start country life in a pastoral form also reduces capital need immensely. Not much investment is needed for large farm buildings. Besides, it gives an opportunity for the non-agricultural population of the Jews to learn country life gradually. The principal investment would be in live stock.

The climate is very healthy, even though it is warm. There are no colds, no tuberculosis, no pernicious anemia, no rheuma, no crowded tenements, no houses in dark evil smelling ghetto-like cities. Much open air life all year round, blue sky, good food and plenty of it. Here, after some time, the degenerated oriental ghetto Jew will bring forth a new generation which will forget money lending and dollar hunting and will turn to lion hunting in its spare time. The Jews will revert to the sound way of living of their ancestors in Egypt; they will become shepherds again and farmers, and have world famous home industries, yet will enjoy more civilization on their ranches than the Jewish kings enjoyed in Jerusalem. The chances of development are tremendous.

Sounds good! But isn't it easy to dispose of a land which belongs to other people? What are the owners going to say?

Well, the whole world will call this idea simply preposterous! The people of Great Britain and the Empire will be amazed and stunned at the audacity of the Jews in casting their eyes on a big chunk of land conquered by Great Britain and now a self-governing dominion. And the few settlers of Rhodesia will raise a howl that will be heard from Africa to Europe and America.

But I say to the dumbfounded world that Great Britain, upon second thought, will consent. Moreover, she will regard this idea a "Godsend" for her imperial enterprise in Africa, provided that the whole world and the united Jewish people keep on bearing pressure on her to disgorge this almost empty territory, especially if she is reminded that she is sprawling over one-quarter of the entire globe and holding

huge territories that are almost empty. And while England herself is one of the most crowded places in the world, in the colonies and dominions as a rule small oligarchic groups, made up of land speculators, grab most of the land and other natural resources, and then restrict the immigration.

After all, Great Britain wants settlers in Rhodesia, and if she settles the Jews she will still have Rhodesia, but as the powerful dominion of Nova Judea, a strong military power against any eventualities, and a faithful pillar of her Empire, because the Jews would be obligated to her forever. She could form the new nation to fit into her pattern of empire, and also would have ten million first-class customers, which is the number, I believe that can be settled there within ten years successively, and which number will be comprised of all the able-bodied Jewry of the world.

When the ten million Jews have been settled, the whole of Rhodesia will have a population of about twelve millions. This will give a density of about twenty-seven souls to the square mile, as against seven hundred in England and Belgium; four hundred in Japan; three hundred and sixty in Germany and Italy; two hundred and forty in Switzerland; one hundred and twenty in Palestine at the present time, but which, if the Zionists settle their proposed two or more million Jews there, would have a density of three hundred per square mile; and in the U. S. A. about forty-five. So the country would not be overcrowded, even though not all of it is fit for white men. Most of the territory is fertile and great industries may develop in it. Therefore I believe it could easily support twice as many people. There is room for 25 millions. So the Jews could not only settle there in toto, but be assured of their future also. On the 442,000 square miles at present are scarcely 2,000,000 souls. This territory supports hardly 65,000 white settlers, including 2500 Jews. This is all that Great Britain has been able to settle there in half a century. Rhodesia equals France, Germany and England, put together, in size. In the latter three countries there are 157,000,000 inhabitants. Yet 13 million white Africans, the Jews, have no country of their own.

How can Great Britain answer this before God and all Mankind?

Now, who are the 65,000 white settlers, anyway? Mostly retired civil servants, army officers, and a few capitalists who are mostly big game hunters and land speculators. Of course there are some farmers and businessmen too. But the leaders form an oligarchy, as in all these colonies in the new world, and they sprawl all over the land and all its resources. Southern Rhodesia is a self-governed dominion. That means she has a Governor General who represents the Crown and has a parliament with two chambers. This designation seems to me a little funny, for 53,000 white people. Why, any little provincial second-rate town in England has a larger population, and has merely a mayor to handle its administration. But the most serious excuse that Great Britain will offer will be that, she cannot "rob her dominions of their rights!" Sounds like the "states' rights" argument in the U. S. A., and the same kind of interests are lurking behind these high sounding "democratic" protests! The black population, of course, is not much of an administrative problem.

But the present dominion settlers need not be alarmed. What will happen merely is, that the Jews will take up the empty land and become the majority in the state, but otherwise no change would occur in the economic or political situation of the settlers. True, the dream to make it a pure English settlement would be shattered. But are there not enough large English settlements in the Empire? On the other hand, the influx of ten million settlers during a period of ten years would bring such a boom to the South African countries as they have never seen before. Because the Jews are not all penniless immigrants in quest of a job; they will bring capital, or, if not actual capital, they will have credit. The policy would be to select the best land and forest districts still unsettled and establish Jewish colonies there, on both sides of the Zambesi. Only a little more than half of the immigrants would need land and forest; the other half would probably build towns for their industries and business houses, public buildings and institutions. They would start settlements in

Southern Rhodesia, and as this country reaches the saturation point, the new waves will be directed across the Zambesi River toward the north, until they are all settled. The name would be changed then into Nova Judea, but the old settlers would be at liberty to call it Rhodesia for sentimental reasons. The government language would be English and Hebrew; all documents and money would be printed in these two languages. The whole administration would be continued by British civil servants until this conglomeration of polyglot Jewish settlers is absorbed and trained into a homogeneous nation.

As to the natives: All of their rights will be respected of course.

Now let us look at the world political situation of Great Britain. She owes to the Jews an unfulfilled promise, a "national home" in Palestine, according to the Balfour Declaration. Here is her terrible dilemma. If she keeps it, she arouses the whole Arab world; if she breaks it, she will ruin her much damaged prestige. But what an enormous gain in prestige it will be if she solves the Jewish world problem—this age-long festering cancer on the body politic of the West! What a relief it will be if she transfers ten million hated persons out of the most crowded part of the world to Africa! The great tension in Europe would disappear immediately. She could keep that Continent in check and pacify it at once. Britain's political gain would be boundless, and so would be the moral gain. It would be the greatest diplomatic victory in her history. For ages the Jews have been the scape-goat for whatever happened. Once they are safely tucked away in Central Africa, defending the Empire on a vulnerable point, it will never happen again that unscrupulous and irresponsible Jemagogues can ride into power on an antisemitic wave and threaten the British Empire!

Taking into consideration all the arguments enumerated, I believe Great Britain will not refuse under the pressure of world opinion, and that, urged by the instinct of self-preservation, she will live up to her mission in world history, to resurrect and regenerate downtrodden ancient peoples. She has

proved this in Egypt, Mesopotamia, and India. Why not for the Jews also? Seems to me my idea is not so preposterous after all!

And so we reach the crux of the whole problem with the question how about Palestine? The "only legal homeland" of the Jews?

If the bulk of the Jewish People could be settled in Nova Judea (Rhodesia), their economic and political problems would be solved for good. There remains the religious and spiritual problem. The orthodox Jew goes on praying to God that he may return to Jerusalem. The religious man does not follow convincing facts, he is a believer and follows traditions and the tenets of his faith. He would never feel satisfied if his spiritual and religious life could not be nourished from Jerusalem, it is the symbol of his faith. If it would be returned to him and made the living spiritual center of his faith again, all his wailing would end and he would regard the "promise" fulfilled.

So why not give Jerusalem and the adjoining Biblical places back to its founders the Jews, in the form of an extraterritorial site for the erection of their institutions of learning and religious culture? It could be made the Jewish Vatican where the High Priest resides without worldly power. The spiritual center of Israel. Wouldn't it be fair if the people who founded Judaism and Christianity would be entrusted with the guardianship of the Holy Places and monuments of both great religions?

In return the Jews would consent to Palestine being incorporated into a Pan-Arab Federal Empire. Thus the dreams of both Jews and Arabs would come true at the same time, while Great Britain would be absolved from her promise of securing a national home for the Jews in Palestine—in spite of the Arabs. This would solve the toughest Gordian knot in history!

And why shouldn't the Jews support the aspirations of the Arabs if they can obtain a fatherland? Aren't they cousins after all? Why not cooperate rather than be divided by

a third party for selfish purposes? Can either the Jews or the Arabs afford this quarrel in their present situation? Cooperation would improve their chances in reaching their goals. Therefore a reconciliation must take place as soon as possible!

VII

Having pointed at the goal, I shall attempt to show how to reach it finally.

Humans being what they are, I expect tremendous opposition from the smug Jews and Gentiles. Particularly from the well-to-do Jews, businessmen, professional people and rabbis with fat incomes. This class is always willing to betray the legal aspirations of the selfrespecting Jews for an independent homeland. These assimilants are always ready to wrap themselves in the national flag of their present country and renounce their Jewish nationality. They are the "Quislings" of the Jewish People and the "Collaborationists" at all times and places. They were ready to help the Hyksos when the Jewish People lived in Egypt, they refused to leave Babylon when in exile and so on. Now they are 100 per cent Americans, Hungarians, British, Italians or French, yes even Germans. Behind their attitude there lurks selfishness, indifference and fanaticism. Only Hitler's method is convincing to them, my pleading annoys them. It will come, every country will take its turn!

However no halfhearted solution will help this time. The Jewish World Problem must be solved now or never. Isn't it strange how many plans have been offered without success? Yet we have a plan as an example which succeeded brilliantly, but this is the only one which has never been offered the world. It secured a homeland for the Jews in Palestine for

1200 years. It is the plan of the greatest Jewish statesman, Moses. This is the plan I am going to offer too. Let us try it again.

When Moses surveyed the situation of his enslaved people in Egypt, he came to the conclusion, that only:

Total Exodus and Regeneration of the Jewish People in a New Fatherland can solve their desperate problem.

And this is the situation of the Jewish People today also. They are definitely not wanted anywhere! After the operation of a cancer, if only a single root is left behind the growth will start again. If the exodus will not be TOTAL, the problem remains unsolved, because it will serve as nourishment to eternal antisemitism.

VIII

This breathtaking suggestion will overwhelm everybody for a while. Why, this is such a task that nobody would take seriously at first glance. How can you move at least ten million people? And how would you go at it even to persuade the world to undertake such a formidable job? I shall show that the whole enterprise would not be anything else but a large scale military maneuver if the proper organizations are entrusted with the job. Let us move step-by-step.

The first step will be to start the movement all over the world. For this purpose we have to organize the Nova Judea League. It shall start and grow like an avalanche in the high mountains. From a little snowball develops a torrent of huge masses of snow, ever growing bigger as it approaches the plains. As this message reaches ever increasing circles, let

there be formed a nucleus in every community. When 10 men or women become converted, both Jews and Gentiles, let them form a club for the organization of the Nova Judea League. Then let them elect their most agile, able and loyal member to be the "Scout" of this nucleus, he must be a Jew. These Scouts shall be organized nationally into a semi-militaristic organization like the Boy Scouts. They will be the responsible leaders of the great exodus. Their duty is to spread this message, instruct, help, organize, collect the money and fight back. They shall wear a Scout uniform and a badge with the inscription: Nova Judea Scout, and the Star of David on their sleeves in blue and white color.

The second step will be to elect the members of the Jewish World Congress. They should be elected by the Scouts from among themselves. This body should meet at once in Geneva in the palace of the League of Nations, for the purpose of passing the following resolutions:

1. The entire Jewish People, supported by all Governments and leaders of the Gentile world submit a petition to leaders of the British Empire requesting that Rhodesia, South and North, with the exception of the North-Eastern annex, be turned over to the Jewish People for the purpose of founding a final homeland, as a substitute for Palestine, reserving Jerusalem and adjoining Holy Places as an extraterritorial site for a religious and spiritual center of Israel without worldly power. In return the Jews will renounce any rights on Palestine and support a Pan-Arab Federal Empire. Rhodesia shall become a British dominion under the name of Nova Judea. The whole deal shall be carried out in the form of a purchase and the Jewish People shall regard the purchase price as their national debt.

2. The entire able-bodied Jewish People in all parts of the Earth shall resolve a total exodus to Nova Judea within 10 years, up to the age of 50. Up to this age within 10 years every able-bodied man or woman must liquidate and join when called upon by the Exodus Authorities.

3. Excepted are the aged (over 50) and the infirm.

They may finish their lives under the protection of the Red Cross wherever they are. They will die off anyway within ten years. But they may join later provided that they have the means of support or are taken care of by relatives.

4. Selected leaders of Jewish religious life, scholars, students, pilgrims and a certain quota of deeply religious persons may settle in Jerusalem, the territory of the Jewish Vatican. Their number will be decided by the Government of Nova Judea in collaboration with the religious authorities of Jerusalem.

5. Election of an Executive Body. (The Hebrew Committee of National Liberation might form a nucleus for that.)

When the Jewish World Congress passes the resolutions just enumerated, the ball may start rolling.

IX

Having obtained the consent of the British Empire we may get busy working out the plans for the total exodus. How can 10 million people be transplanted into a new world within ten years without incredible hardships and suffering?

Of course everybody has the picture of a California goldrush in mind, with its boomtowns, crimes, hardships and panics. A free for all fight and let the devil take the hindmost. Everybody knows where it lead to. The big fellow grabbed all that was worth grabbing and left the little fellow all the "freedom and democracy" he could stomach. Today the successors of the big fellow represent the most reactionary group in the civilized Western countries, while the little fellow's descendents are doing the bragging about

"God's own country" and the fighting for "freedom!" That won't do for the Jewish People, neither would the British Empire stand for such methods. Instead the whole migration must be conducted according to a blue print, must work smoothly like a clock, law and order being the watchword. This of course could never be achieved if the 13 million Jews scattered all over the world, speaking different languages were left to shift for themselves. This migration can only be carried out on military principles. It would be a huge army mobilized for invasion. The entire Jewish People would have to be registered, then organized into groups on selective service principles and expediency. There would be a first line, a second line, reserves, engineer, transportation, medical corps etc. They would carry out the invasion in waves, perhaps as follows:

1. The pioneers. They will do the spadework, surveying, roadbuilding, working out plans for the new towns, create hospitals, transportation lines, radio and telegraph stations, barracks and hotels to receive newcomers, schools, administration centers etc. Therefore in this group every able-bodied single man and woman, or childless married couples, up to the age of 50, shall be drafted. The brain and brawn of the Jewish People and of course mostly from Europe. They need little time to "liquidate" their properties. Hitler has done that job for them already.

2. The flower of Israel. Married couples with children up to the age of 35.

3. The middle aged. From 35 to 50 but able-bodied.

4. The aged and infirm. Those over 50 and the infirm may volunteer, because they are exempt, provided that they have the means of selfsupport or have relatives willing to take care of them.

These three first groups would be drafted successively and called to the colors according to expediency by the Exodus Authorities.

But who could undertake such a formidable task, who

has all the technical knowledge to handle such great masses of people and settle them i.e. carry out this invasion? Only the General Staff of an army or navy could do it of course.

And why not? After the war these organizations would enjoy doing it, it would mean a large scale maneuver for them and more experience.

The General Staffs of the three great powers, America, Great Britain and Russia would work together and undertake the organization of the exodus as follows:

The New World would be handled by the army of the U. S. A.

Western Europe and British Empire by the army of Great Britain.

Eastern Europe by the army of the USSR (Russia), with the seat of the High Command in New York, London and Moscow respectively.

These armies would do the technical work, while the civil and liaison work would be done by the Exodus Commission whose executive body would be the Nova Judea Scouts. The army staffs and the Exodus Commission together would form the Exodus Authorities with a seat in London. Once this machine is set up and the go signal given, the world would be surprised to see every year one million Jews at the least, silently sailing away to Nova Judea and settle there. The navies, merchant marines, private shipping companies, airlines and railroads would be humming with activity, carrying the Jewish People into their final homeland. And as the exodus progresses so the hopes and enthusiasm of the Jewish People will grow greater and greater. The avalanche started from a little snowball will become a torrent. And with good reasons. Nova Judea is the TRUE "Promised Land," that great country promises tremendous possibilities in agriculture, industry and other human endeavors. There the Jews will found New Jerusalem, create a new civilization, build a true democracy based on social justice, freedom and equal opportunity for all and really

mean it. They will see to it that agricultural and city pursuits shall be well balanced on a 50-50 basis. Since electricity is so abundant the whole country could be based on 100 per cent electric power, with airconditioned houses and electric frigidaire even in the jungle, a subtropical country is the most pleasant temperature to have. Swamps can be reclaimed, mosquitoes exterminated, tropical diseases conquered and the whole Nova Judea transformed into a huge garden city. What was the "Promised Land" of Moses compared to this? Who cares to go to Palestine and its barren hills to live like sardines packed in a tin can?

All this can be carried out within ten years if the Jewish People really want it. Where there is a will there is a way. Under the experienced guidance of the British Civil service, the administration would be managed by the Exodus Authorities and the British Government until the settlement is accomplished i.e. the first 10 years and then selfgovernment would follow. The frame for this is already in existence in Southern Rhodesia.

X

A beautiful dream! But where will the money come from?

Billions have been provided for Armageddon. Billions for arms, ammunition, ships, supplies, etc. only to be blown into the air or sent to the bottom of the sea. Yet the billions kept on pouring in daily from all over the world. Where did it come from!

Couldn't the world raise the money for the greatest humanitarian work in history if it would not cost more than one month's warfare? To finance the exodus would be but an

ordinary routine work for the great financiers if Jews and Gentiles would cooperate.

To finance the exodus the Jewish People need the foundation of a national bank and then a national loan. How long would it take the Jewish and Gentile bankers of America and Great Britain to create the National Bank of Nova Judea? One serious session. When the Bank is founded, the machinery of the State of Nova Judea created and the consent of the British Empire obtained, what would be in the way of floating a big loan to finance the exodus?

There are still 13 million Jews in the world, even though the majority now are poor, I wonder if they couldn't command a credit of \$1000 per head? That would mean 13 billion dollars. Yet the whole migration and settlement might not need more than one fourth of this sum. Because the purchase price would be loaned them by the British Empire on installments. Only the cash expenses of the migration and settlement would have to be defrayed from this loan and the funds of Government. I doubt if anybody would regard this new nation of Nova Judea a bad risk! Aren't they composed of the most brilliant business talents of the world? Just give them a chance and see! Any loan would be picked up and over-subscribed by Jew and Gentile in no time. For the Jews to buy the bonds of Nova Judea would be obligatory.

Besides there will be substantial savings. All Governments would grant free transportation to the harbor of embarkation. Beyond that the well-to-do Jews would pay for their tickets, only the poor Jews would be given a free ticket.

The settlement would be carried out according to plans. There will be but one real estate agent, the Government of Nova Judea. The plans of the blueprinted cities will be shown to the newcomer, he may choose his city lot or homestead in the country, and if he has money he can pay for it availing himself of the credit facilities afforded him by the Bank of Nova Judea. If he has no capital he may join a co-operative or obtain small credit, at low interest rates. Most businesses and farming enterprises will be handled the co-

operative way, because of lack of capital and labor. Only the capitalists can start independently right away.

All Governments will see to it, that the property and businesses of their Jewish subjects shall be restored to them and liquidated in orderly manner, permitting them to take their capital along either in cash or in natura.

It is needless to say that the rights of the natives, white or black, would be respected in every way. The Jewish People would take nothing without paying for it. Land, mineral deposits, businesses or industries under personal management and cultivation remain untouched, no matter who owns it, white or black. But all land not under personal cultivation, forests or mines not operated, shall be subject to settlement by the immigrants. It becomes property of the People of Nova Judea, it is included in the purchase price and will be paid for by the Jewish People to the British Government. These payments would start long before the whole nation is settled. No sooner will the first immigrants get started when they begin to earn, pay taxes and become prosperous, happy citizens of the new and final homeland. Once the first communities appear, the remainder will grow like mushrooms. And they will become magnets, drawing new settlers, hopeful humans, marked by Hitler for slaughter!

No one is more aware of the fact, that this solution is harsh, painful and connected with much hardship. It is bitter to leave the land of our birth, particularly such great countries like the U. S. A., Switzerland, France, Italy, even a prewar Hungary. It was bitter even to leave Egypt, the land of servitude and Babylon the land of exile. Yet in all of these countries, no matter how hard the Jews tried and how loyal they were, they remained an object of contempt and hate. Their sojourn there was a matter of tolerance and mood of the host. No living Jew knows the sublime feeling to be at home in his own fatherland at the mercy of no other races! This feeling has been granted only to those nations who conquered their own Fatherland.

This is what my solution would mean to the Jewish

People. No amount of hardship or suffering is too great a price for this. Think of it, how much more hardship had been endured during the first exodus under Moses and yet did it bring a final home? It was a failure, it brought but a temporary home and was the starting point of endless horrors for 1800 years.

Then why not bring one more supreme sacrifice, if all this age old suffering, humiliation and persecution could be wiped out?

My plan would bring the final solution of the Jewish World Problem now over 1800 years old! It would solve it to the satisfaction of the entire Western and Eastern world and the most persecuted and outraged people on Earth would reach their "final home" at last, the true "Promised Land" in NOVA JUDEA!

XI

ANGLO-SAXONS of the British Empire!

Since the dawn of history there has never been a greater Empire than yours. Not only in size is your Empire great, but because of your principles, and the methods by which you have carried out that stupendous organization. Where you rule there is justice, order, tolerance, freedom, wealth and civilization. You have a mission! This mission is to emancipate, rule and colonize backward peoples and countries. You have not only created new white countries, but also resurrected ancient peoples, as in Egypt, Mesopotamia and India. Of all times, you have shown the greatest colonizing genius. But your mission would not be finished if you failed to solve the greatest colonizing and regenerating prob-

lem of all times. Providence seems to have reserved you for that purpose. This mission is the solution of the Jewish World Problem, the key to which lies in your hands. Having colonized so many inferior races, why should you refuse to help the Jews, of whom the ten lost tribes many of you claim as your ancestors, and especially since you are also bound by your mandate to help the Jews to a "national home" in Palestine? Can you refuse in honour?

You rule one-quarter of the entire earth; yet many of your dominions are almost empty. There is Rhodesia, 442,000 square miles, in which territory only about 65,000 white people have been settled in half a century. Can you answer before God and the world why you permit a few thousand settlers, mostly land speculators, to sprawl over that huge territory, while at the same time you allow thirteen million African white people, one of the most gifted races in existence, to be kicked about, roaming all over the world homeless? Wouldn't they become your most useful citizens and a pillar in your African Empire if you settled them in Rhodesia, making that country the fatherland of the Jews, Nova Judea, a British dominion? Wouldn't it pay to overcome the objection of those few thousand white settlers, whose only objection could be that the country would not become a pure English country, as they had planned. Great Britain has plenty of territory for pure English settlements. Would not ten million picked men and women, ready to form a strong army in defence of the Empire, mean a great gain to you in your present political situation? And incidentally, would not this relieve the pressure all over Europe? Besides, it would save you the necessity of antagonizing the Arab world in Palestine in a hopeless undertaking. A Jewish National Home in Palestine would not solve the problem anyway. Unless the Jews can get a country in which all of them can settle and find room for future development, the trouble and expense you are taking in their behalf hardly seems worth while. Rhodesia is the right place for this, and further, such a colony would also be of great material advantage to the British Empire. Rhodesia would not only become a

military stronghold against invasion from either side, but Great Britain would have at least ten million more customers! The prestige of Great Britain would be enhanced and the poisoned atmosphere of Europe cleared. It would be worth the sacrifice.

Anglo-Saxons! You are the only race on earth that has not conquered nations or colonized countries for greed or lust of power alone! Your purpose has been to further civilization, progress, freedom, prosperity and humanitarianism. The greatest humanitarian work since the dawn of civilization would be to secure a sanctuary for that persecuted race, the Jews. It is up to you and to your advantage to solve the greatest problem of mankind in world politics. You can solve it, and I think you will solve it, because you have taught the world fair play and sportsmanship. Since the conquest of several leading civilized nations by the barbarians from within, which lead to this world catastrophe, all nations look to you to champion the cause of freedom, justice and protection of the weak nations. If you fail, barbarism will engulf freedom and civilization. Live up to your noble mission and remain faithful to your traditions.

Nothing will commemorate the spirit of Cecil Rhodes more than the decision of the British People to erect on the spot which he conquered, the greatest humanitarian work in the history of mankind—a monument to themselves and their colonizing genius, which will outlast the British Empire and many Empires to come!

XII

Before finishing, I want to give the Jewish people of the world a solemn warning.

Hear Oh Israel!

Nova Judea in Rhodesia is your last hope and your only chance to build a final fatherland for all of you, during the remaining lifetime of mankind! Providence seems to have reserved this last free spot in Africa for the only white African people left, the Jews. This is THE "Promised Land," because it is the land of Hope! Awake and unite for the conquest of this country before it is too late. The vast majority of you are still in bondage, as in Egypt. Gather up and start your Final Exodus. No sacrifice is too great to attain this goal. Quit running from one country to another, hoping to find a haven at last, for you will never find one—only temporary moods of tolerance. You are definitely not wanted among the Gentiles. Your many attempts at assimilation have failed! You are permitted everywhere to partake in the chase, but when it comes to dividing the spoils, the Gentiles take the lion's share. There is no other solution for you but to found a fatherland where God saved the land for you. He did not intend Palestine to be your final home; he meant it only as the place where you should make your first attempt at founding a fatherland. But you failed miserably there. It turned out to be nearly your longest sojourn during your wanderings in quest of a fatherland from the time you left Egypt, your birth place and cradle of your nationhood!

Therefore, quit mourning Jerusalem and quit praying for a return to that place of sorrow and defeat! Turn your face:

toward Rhodesia, the Land of Hope, with the determination to become an independent, free people. Draw a lesson from your past experience and use it in the upbuilding of a final home if you want to survive. Remember, your historic mission is ended, and if you get this country, Messiah has arrived. Therefore, rid yourself of the ghetto spirit and Messianism. Keep the best of your religion, but become a civilized member of the Power Age. I appeal to you now, especially to the younger generation of Eastern Europe.

Cease to be a pariah and throw off the habits of the ghetto; its Rabbinism, the tyranny of ritualism and ridiculous formalities, which have nothing to do with true Judaism. Get rid of your fanatics, your whirling dervishes of orthodox Judaism. Follow the more enlightened, progressive younger ones, who, though true believers, will not make life a burden for you, with the religious acrobatics of the ghetto rabbis. Quit being the caricature of mankind, which they made out of you in the ghetto. Throw off the Kaftan and your Chinese queues, the corkscrew locks and the long unhygienic beards, the symbols of your humiliation. Become a Westerner; your exile is over when you have entered Nova Judea.

Unite and leave this world of degradation and persecution. What have you to lose but your hopeless future and your gypsy status? No matter how well you are situated in any country, fundamentally you remain a pariah and a wandering gypsy, even in silk hat or the uniform of a diplomat.

Get out of the way! Retire to a quiet place and develop there your ancient ideal, the Land of God. This you could never attain in Palestine, that small dry spot which has been and will always remain the battleground for ambitious imperialistic powers. Of all places in the world, it is the least suited to a spiritually minded race. But in Rhodesia you can found a New Judea and a New Jerusalem. There you can build anew the Temple of Solomon, on a spot a thousand times more fair than the one on which the ancient Temple stood, close to a spot that is one of the world's wonders, the

Victoria Falls, you can erect your Temple, wherefrom you can roar louder than the waterfalls do, your famous monotheistic admonition: "Hear, Oh Israel, God the Almighty is One!" Here you can bring to fruit the great lessons of experience which you gathered during your wanderings. You have learned more than any other people. You have picked up the cultures and civilizations of 4000 years as you went from one empire to another; mixing your blood with all the great races, you have inherited the abilities of all of them. Your great assets are brains and moral fiber. All you need is a place in the sun where you can strike root. There, melting in your own national crucible all this accumulation of spiritual wealth, you might indeed become the "Chosen People"—with honour and self respect, instead of being called so as the irony of fate!

You have arrived at the real turning point in your history, now when the map of the world is about to be remade! After the conquest of the barbarians from within most great nations will enter into a new world outlook and a new social and economic order. And when this comes to pass, an alien, wandering, parasitic, unassimilable, but gifted people such as you will be definitely liquidated. This liquidation will be carried out according to the methods of barbarians. **You can see it coming.** And you will react in the old way. You will run in all directions and start anew. Just now your trust is in America. But beware for you are going to be gravely disappointed soon. The U. S. A. is no longer an Anglo-Saxon country; it is merely glossed over with Anglo-Saxon ideas. Underneath lurks a great ocean of intolerant races, and the saturation point is almost reached for your people. Soon the liberal era will come to an end in the U. S. A., a barbarian upheaval from within is in sight. They are stronger right now than the army itself, and the army is far from liberal. When the U. S. A. turns the cold shoulder to you, where will you turn from there? This has been your last refuge.

In these fateful days, if the remaining thirteen million Jews would become a solid front, and all

over the world would unitedly demand, that Great Britain give to them the country I have proposed, and get the Gentiles to support their demand, then the Exodus would become a reality. My fear is that you Jews, being what you always have been in the past, a dissenting, turbulent, individualistic and fanatical people, will miss this historic moment. You will oppose my plan more fiercely than the Gentiles, without regard for the consequences.

The orthodox Jew wants to wait for the Messiah; it is so much easier to wait! The assimilant will have nothing to do with a regeneration of the Jewish State. The Zionist wants Jerusalem. The Marxist is against nationalism on general principles. The liberal will call my proposal outrageous Fascism. The wealthy Jews of course have always looked upon Zionism only as a boon for the poor. The rabbis will call my plan contrary to God's will, for fear it might break their hold on the Jewish People. And so I am afraid the Jewish People will run blindly to its own destruction. Perhaps this is God's will, and is better than the continuation of this pariah existence. I shall not despair over it, because I belong to that type of men who have little use for life anyway; it is futile and meaningless. But to those Jews who do believe in survival, I say this: Only radical procedure and coercion will make this conglomeration of different polyglot peoples, called the Jews in the diaspora, act unitedly for a common cause. Therefore, I recapitulate:

1. Jews: Organize small cells in every community of the world where Jews live, and under the guidance of your Scouts join the Nova Judea League. Go into action spontaneously and simultaneously everywhere. Cooperating with the Gentiles, put my plan into realization with all your heart and soul and means. Show the world as fervent and fanatical a desire to have a place in the sun as you saw the misguided German people do, to regain their lost world power. Your determination must be desperate, like that of a man who fights for his life. Only thus will you convince the world that you want a home of your own.

2. You are again in the desert, and will have to accept

the leadership of a Moses or a Messiah. This time it shall be the British government. Under the disinterested, wise and experienced leadership of the British Civil Service and Army, you will be able to conquer your final destination, a Fatherland in Nova Judea. Under Jewish leadership you would rebel and fail. Remember what Moses said to you under similar circumstances: "You are a stiffnecked people!"

3. This being a war of conquest, suspend your desire for self government for awhile. Accept military rule until you are settled. You must goosestep for 10 years at least until you can be self governing. Until then keep away from politics and party strife!

4. This being a war, you must act under discipline and use compulsion toward each other to make yourselves comply and obey. This is no time for arguing and persuasion. Everybody will have to be conscripted and become a soldier, fighting for one goal only: Nova Judea.

5. Renunciation will become a necessity. You will have to give up many things and put up with many hardships, and bring great sacrifice. So don't howl "Outrage, Fascism, Reaction!" Don't play the role of the martyr in the hope of remaining where you are rather than submitting to this radical surgical operation. The age for this stunt is over. All the hardships, force and outrage which I am proposing in the interests of a total solution to the Jewish World Problem is gentle child's play compared to the horrors and ruin that is ahead of you! Hitler's three million victims is but a foretaste.

Isn't it worth your while to make this one supreme sacrifice and effort in one great renunciation and decision to become a free independent people at last with the hope of a future, instead of remaining the pariahs of the West? Look back into your history! The question now is: "To be or not to be!"

But even if you do reach your goal and settle in Nova Judea, you will never become a happy nation unless you

change your ideas and one sided ghetto-city way of living. No nation can exist independently if everybody is a middleman and a trader. This is a parasitic way of living which you acquired during your wandering life. This is the main source of antisemitism.

A healthy nation must have its roots in the soil. Therefore, go back to the land as your forefathers did. At least half of you must become country folks, lovers of nature, flowers and animals. You must become hard working farmers and herdsmen, lovers of free life; hunters rather than money changers. There must be a healthy balance between country and town population, and home industries must flourish. No get rich quick ideas! Leave them behind! Seek clean, modest, cultured life; turn your eyes more to the spiritual values than the material. The ghetto and exile is over. You will have more time for self improvement now. Art, literature, refined social intercourse will be your pastime. Thus will you become a model state and the really "Chosen People"—without irony!

And then the Messiah will come in the spirit of Daniel, who saw the rise of the Empire of Messiah. But Messiah will be the Jewish People itself, through its formidable, indomitable will to survive all the horrors of the past and rise into a glorious future!
